

Cancer and Your Pelvis

The pelvic floor is one of the least talked about body parts, but it's one of the most important ones. It helps to control urinary, sexual, and bowel function. Surgery, radiation, and medication can all contribute towards dysfunction of the pelvic floor leading to impairments, such as pain with sex, urinary and/or bowel incontinence, and pelvic pain. Melinda Marshall, PT, MPT, will discuss how cancer treatments can impact the pelvic floor, and how physical therapy can help.

Presenter: Malinda Marshall, PT, MPT, has been a pelvic floor physical therapist for Pelvic Health and Rehabilitation Center in Los Gatos for 6 years. Prior to moving to the Bay Area, she treated pelvic health in Los Angeles. Malinda discovered her passion for pelvic health while in physical therapy school at the Royal College of Surgeons Ireland. After completing a clinical rotation in women's health, she knew this was her calling. She quickly expanded to treating men's pelvic health as well. When Malinda is not in the clinic treating, you can find her cooking and gardening with her husband on the coast.

Date: Wednesday, January 30, 2018

Time: 6:30-8:00pm

Location: Cancer CAREpoint Resource Center
2505 Samaritan Dr., Building 400, Suite 402, San Jose 95124

Space is limited and advanced registration is required. Please register by calling Cancer CAREpoint at: 408.402.6611 or email info@cancercarepoint.org.
